The people who brings smile in other face even without being physically present with them are true 'MAGICIANS'. Be the reason someone smiles. Be the reason someone feels loved and believes in the goodness and people. It takes a lot of energy to the negative. You have to work at it. But smiling is painless. Making on person smile can change the world. Maybe not the whole world, but you will change their world.

A suave, poised story of Bhopal, Rewa and other 10 villages based man, founder name Prashant Tiwari who is running a NGO name 'Think for Smile Foundation' with other 7 team member and 9000 volunteers mainly who works for education, health, women empowerment and clean city.

Also, education will help to gain a reputation by being in a great position. Education lessens the challenges you will face in life. The more knowledge you gain the more opportunities will open up to allow individuals to achieve better possibilities in career and personal growth.

You gain knowledge, skills and experience to help you both in career and in life general. On the top of that by gaining additional skills in communication and problem solving and achieving your goals, you can also increase your confidence.

Women empowerment is very important and massive aspect of this future. Women will grow, learn and will rule the world incredibly. Women will be independent and this will decrease the chances of amniocentis, rape, violence against them.

No matter how much powerful a woman is, no matter how is she rich are skilled, the only fact is that women don't get that much equality and support from society. Men's have always used their superiority and power over women. It is a very high time that we all should stand up in unity for women equality and rights.
